- 22) Describe a fire that broke out in your neighbourhood causing loss of life and property.
- 23) The qualities of an ideal teacher. **(Weightage 2)**

XI. Read the passage given below and answer the questions that follow :

Nowadays we pay a great deal of attention to pure air, open windows, to freedom from dust and to garden cities. Pasteur was one of the first to show how necessary all these are if we are to fight against germs and disease. Another very useful discovery of Pasteur while he was working in Paris was the process which we now call, after him, 'Pasteurization'. Some French wine-growers were troubled by a germ which had turned their wine sour. Pasteur showed that by heating the wine, or milk, or whatever it might be, to a temperature of 50 or 60 degrees centigrade, the germs were made harmless. Pasteurised milk is milk which has been treated in this way and then sealed to prevent more germs from entering. Louis Pasteur was what we would call an 'all round' scientist. All the research which he did in his laboratories was meant to help his fellow human beings. It would be impossible to imagine Pasteur experimenting with explosives or poisonous gas.

Questions :

- 24) 'Pasteur was one of the first to show how necessary all these are...' What does 'all these' refer to ?
- 25) What was Pasteur's other useful discovery ?
- 26) What was the problem faced by the French wine-makers ?
- 27) What solution did Pasteur offer to the problem ? **(Weightage 3×1=3)**

XII. Study the diagram given below and answer the questions :

Histogram of students' private study time

* One per cent of students were recorded as studying between 2.00 and 2.15 a.m.,

(From Central Statistical Office, *Social Trends* No. 5 (simplified))

- 28) What is the most popular time for private study ?
- 29) What is the percentage of students who do private study between 2 and 3 in the after-noon ?
- 30) What is the least preferred private study time in the morning ?
- 31) What is the percentage of students who do private-study after midnight ?

(Weightage 3×1=3)
