Webinar on

How to approach a project: Going from zero to green lights

This brief summarizes the proceedings and outcomes of webinar on “How to approach a project: Going from zero to green lights”, which was held on 17 October 2020. It was organized by Department of Computer in Don Bosco Arts and Science College Angadikadavu in collaboration with **Futura Labs Technologies LLP** Calicut. There were 29 students attended the webinar.

The webinar is about how to do a project in the right way without fear. Ms.Sruthi E Gireeshan the tech lead of Futura Lab Technologies LLP spoke well about what a project should look like.Mr.Manikandan P, the CEO of Futura Labs Technologies LLP spoke in depth about variety of programming languages and issues such as cloud computing and big data that are active in the IT sector today. Today’s webinar helped the students to understand how we should approach a project and what is going on in the IT sector today. The webinar was ended with vote of thanks by Albin Joseph.

You

- TensorFlow
 - Tensorflow is an open-source machine learning library developed at Google for numerical computation using data flow graphs is arguably one of the best, with Gmail, Uber, Airbnb, Nvidia, and lots of other prominent brands using it. It's handy for creating and experimenting with deep learning architectures, and its formulation is convenient for data integration such as inputting graphs, SQL tables, and images together.
